"Idealism in American Literature" was the subject of a brilliant and scholarly address made yesterday afternoon by Dr. C. Alphonso Smith, of the University of Virginia, before the Woman's Club. Dr. J. Allison Hodges, who very fittingly introduced his old friend and college mate, called him a "simple scholar." This "simple scholar" is known the world over and is one of the foremost men of letters of the day, and the honors conferred upon 'Idealism in American Literature" the day, and the honors conferred upon Dr. Smith are by no means confined to his own land and country. Dr. Smith said that he had chosen me of national importance, a of American literature that lies at the root of its power, and that no nation is known beyond its borders except through its literature. After all, it is the great poets and prose writers—"our eternal contemporaries," as some one has called them—who are to carry forward and paint for the nation its ideals. its ideals. If a literature has not a lofty idealism it is doomed.

Defining idealism, the speaker emphasized the fact that there is no other word in the English language more often abused and misused. An ideal s not merely something to talk and rite and think about; hing that one is striving for, and it the striving that one creates the ideal out of the idea. The ideal ciety as a teraced affair, and it is a always touches the will. If the literature of the nation may be called idealistic we can safely trust it to the centuries that come, and American literature is so far from being materialistic that it is far in advance of any modern literature in the world, justified in every page of American fiction. In the comparison of the ideals of the Greek and Elizabethan drama with that of the real dramas of America to-day, one finds the philosophy of the Greek drama is the philosophy of the Greek drama is the philosophy of the Elizabethan drama treats so man; the Elizabethan drama treats so-

In fact, with his walrus-like mustache, his low forehead, his flat, upturned nose and his extremely large ears, he is about the homeliest statesman that has ever held Cabinet office in France since the days of the great Talleyrand. In some respects he recalls that powerful Foreign Minister of so many diverse regimes and governments on the banks of the Seine. For when in central of the foreign affairs of France, he did more to increase the influence and the prestige of his country abroad than any one ise since the days of the ex-Bishop of

Autun.

He was in the recent presidential election perhaps the most serious and dangerous of all the rivals of Poincare. The chief reason, indeed, that he was not elected was because it was feared that his presence at the Elysee might precipitate war with Germany, since the Kaiser created Count Buelow a prince seven years ago as a token of his satisfaction over the retirement of Delcasse from the post of Minister of Foreign Affairs; a retirement to which German agencies notoriously contributed. When Poincare recently resigned the premiership he was anxlous that Delcasse should become his successor; and when Del-
